The Stephens Fuel Company would like mighty well to take care of your coal needs. Our policy toward its customers is QUALITY — PREPARATION — AND SERVICE. The *quality* means the finest coal we can secure. The *preparation* means the cleanest coal possible. The *service* means prompt deliveries; courteous employees trained in carefulness and helpfulness; and much more.

The enclosed return card is for your convenience in ordering. You may specify any date of delivery you wish prior to June 25th.

Wouldn't you be Interested

—if you could get more heat from less coal? It can be done at a slight expense.

A STEPHENS VACUUM CLEANING job done on your heating plant will do it.

Soot and scale are powerful insulators against heat. If they are removed, your furnace will function properly. You use your heating plant about eight months a year. Why not give it a good cleaning? The saving in eight months will be far more than the cost of cleaning.

The Vacuum cleaning is done without dirt or dust.

We offer this service to you, not for profit, but because we know that HOT-TEST anthracite or any other good coal, burned in a clean heater gives the maximum heat return for your coal investment.

There is always a rush for this service at this time of the year. We suggest you ACT NOW. All reservations will be made in the order received. Just indicate on the card enclosed or telephone MOtt Haven 9-4500.
